## 1. About ERA-MIN 2

**ERA-MIN 2** is a global, innovative and flexible pan-European network of research funding organisations, supported by EU Horizon 2020, that builds on the experience of the FP7 ERA-NET ERA-MIN (2011 to 2015).

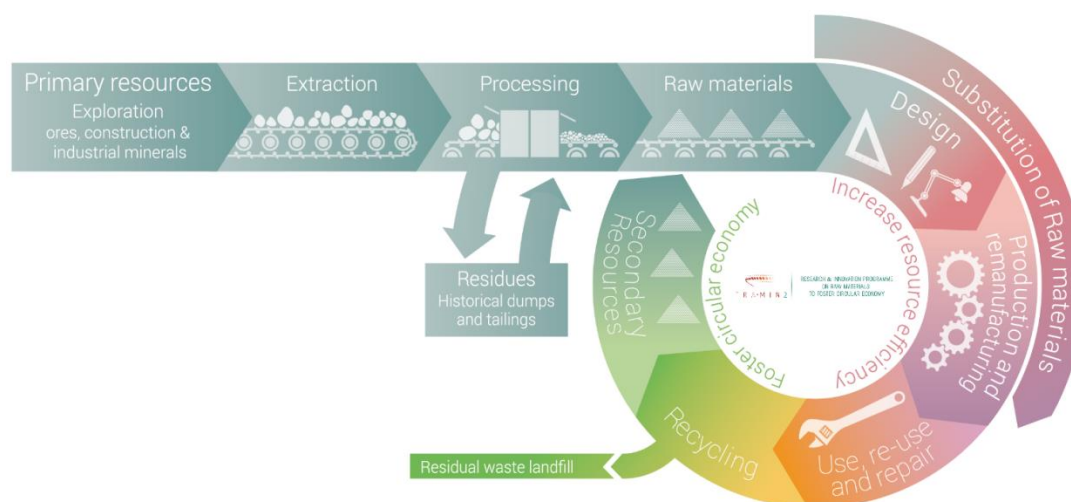

**ERA-MIN 2** aims to support the European Innovation Partnership on Raw Materials, the EU Raw Materials Initiative and further develop the raw materials sector in Europe through funding of transnational research and innovation (R&I) activities. This will be achieved through calls designed and developed specifically for the non-energy, non-agricultural raw materials sector. The network will address four key objectives:

- Support and promote R&I cooperation in Europe
- Reduce fragmentation of R&I funding in the area of non-energy, non-agricultural raw materials across Europe and globally
- Provide a pan-European support network and financial resources to improve synergies, coordination and collaboration
- Improve the efficiency and impact of human and financial investment in R&I activities in the area of Raw Materials.

The **ERA-MIN 2** consortium consists of 21 funding organisations from 11 EU countries and 2 EU regions (*Hermesfonds – Belgium/Flanders; FWO – Belgium/Flanders; Business Finland – Finland; ADEME – France; ANR – France; JUELICH – Germany; GSI – Ireland; MIUR – Italy; NCBR – Poland; FCT – Portugal; UEFISCDI – Romania; CDTI – Spain; ICE – Spain/Castilla y León; AEI – Spain; MIZS – Slovenia; Vinnova – Sweden*), one EU Associated country (*TUBITAK – Turkey*), and four non-EU countries (*MINCYT – Argentina; Finep – Brazil; CONICYT – Chile; DST - South Africa*). **Please note that for the Joint Call 2018 additional Funding Organisations are participating (Table 1).**

**ERA-MIN 2** is supporting the EU's transition to a Circular Economy by addressing topics which are aiming at retaining the value of the raw materials that are used in products and returning them into the product cycle at the end of their use, keeping in mind the need for a sustainable and responsible industrial supply of primary resources to feed the circular economy.

**ERA-MIN 2** will cover the entire raw materials value chain, from sustainable exploration, exploitation, processing, substitution of critical raw materials and resource efficient production to short-term economic feasible and low environmental impact recycling.

**Fig. 1:** Raw materials within the circular economy

The Joint Call 2018 is the second call of ERA-MIN 2. Information and statistics on the projects funded in the first joint call are available at <https://www.era-min.eu/results>.

## 2. Participating Funding Organisations and budgets

24 Funding Organisations have agreed to allocate national/regional budgets for the Joint Call 2018, see table 1 below. The total indicative call budget is €14.430 million.

**Table 1.** Participating Funding Organisations.

Country /Region	Funding Organisation	Contact person (s)	E-mail (s)	Budget (Euro)
Belgium/ Brussels	Innoviris	Beata BIBROWSKA	<a href="mailto:bbibrowska@innoviris.brussels">bbibrowska@innoviris.brussels</a>	1 000 000
Belgium/ Flanders	FWO	Olivier BOEHME, Toon MONBALIU	<a href="mailto:eranet@fwo.be">eranet@fwo.be</a>	200 000

### 3. Important dates

The following dates apply for this Call for proposals:

Call text publication	October 31, 2018
Call for proposals opens	November 20, 2018
Call for proposals closes	January 31, 2019 at 17:00 CET
Communication of Call results	May 14, 2019
Recommended latest date for project start	November 1, 2019

#### 4. Scope and topics of the Call

**The scope** of the Joint Call is needs-driven research on non-energy, non-agricultural raw materials addressing one or several areas of the circular economy, as shown in Figure 1 above. As an overarching objective the proposed research should clearly demonstrate potential to foster the sustainable supply, processing, production and consumption of primary and secondary raw materials in a circular economy. Proposals should deliver convincing arguments on the potential impact of their innovation and research on the efficient supply, processing and use of raw materials. They should be able to quantify the expected impact using appropriate metrics and life cycle thinking. A specific work package on the follow up of these metrics should be considered in order to steer the project into the most environmentally beneficial direction.

The ERA-MIN Joint Call 2018 will address three segments of non-energy, non-agricultural raw materials:

- Metallic minerals
- Construction minerals
- Industrial minerals

The research, development and innovation topics to be funded under the ERA-MIN Joint Call 2018 address all aspects of the non-energy, non-agricultural raw materials life cycle, covering both primary and secondary resources. Proposals focusing on one or more of the 27 Critical Raw Materials listed in 2017 by the European Commission<sup>1</sup> are encouraged.

Besides technological innovations, non-technological aspects will play an important role in paving the way to a circular economy. Consortia may include players from the public and private sector with different backgrounds, e.g. physical scientists, engineers and technology developers, but also social scientists and policy advisors working closely together and covering different parts of the raw materials cycle.

The call focuses on four steps of the raw materials life cycle and horizontal cross-cutting topics. Nevertheless, following a systemic approach, other parts of the production cycle which are not mentioned explicitly (e.g. distribution, use, collection) can be included within project proposals. Big

---

<sup>1</sup> [COMMUNICATION FROM THE COMMISSION TO THE EUROPEAN PARLIAMENT, THE COUNCIL, THE EUROPEAN ECONOMIC AND SOCIAL COMMITTEE AND THE COMMITTEE OF THE REGIONS on the 2017 list of Critical Raw Materials for the EU \(COM/2017/0490 final\)](#)

data and ICT- based tools play an important role across the whole product life cycle to increase the efficiency of raw materials supply (e.g. inventories, supply chain management, automation). Special attention should be paid to reconnecting raw materials to society. Therefore, applicants should describe how their project will engage the public.

For the **objectives and expected impacts** of the 5 main topics supported by ERA-MIN Joint Call 2018 please see the description below. It's encouraged to include cross cutting topics in all topics, as well as addressing more than one topic for a holistic view of the value chain.

1. **Supply of raw materials from exploration and mining:** The availability of primary resources and waste from exploration and mining activities remains a major prerequisite to satisfy the growing global demand for raw materials. Therefore, exploration and mining will not disappear in a circular economy. Within this topic we are seeking for new techniques, as well as better understanding, for the exploration and mining of primary and secondary resources that are necessary for the industrial supply. Proposals can address new concepts, technologies and improved models to be used in mineral exploration aimed at understanding geophysical and geochemical processes and the evolution of the lithosphere, especially in Europe. Moreover, they can target comprehensive characterisation, mapping or remediation of abandoned mine sites, making them also potential sources of various raw materials, including valorisation of by- or co-products in complex mineral matrixes or historical stocks contained in tailings and spoil tips, that addresses environmental and social acceptability concerns. Proposals should aim at significant or demonstrable progress towards the goal of responsible and sustainable mine development, through increasing the raw materials supply while reducing impacts on the environment. Within this approach, contributions on the reclamation of former mine sites are included. Both onshore and offshore proposals will be supported (subject to national/regional regulations). It is encouraged to incorporate for example social science contributions, environmental impact of mines and explorations, new business models, eco-efficient waste management and sustainable management of closed mines and quarries.

2. **Design:** The design of products has a high impact on resource efficiency. Within this topic we are seeking for proposals focusing on innovative product design that contribute to the efficient use of raw materials (eco-design), or the substitution of critical materials in products and components. In addition to the design of products which use fewer raw materials, proposals can address new design concepts focusing on the circularity of products. This includes aspects like the extension of the product durability or the facilitation of its re-use, remanufacturing or recycling. Attention should be paid to strategies and technologies for the substitution of 'substances of very high concern' (SVHCs) of the REACH regulation or substances for which a scarcity may be foreseen. Applicants should be able to quantify the expected impact of the new product design on resource efficiency, using appropriate metrics and life cycle thinking.

3. **Processing, Production and Remanufacturing:** Production efficiency and remanufacturing processes in a circular economy provide a high potential to increase resource efficiency for primary and secondary sources. A major potential to increase the efficient use of raw materials is

provided by resource intensive processes. Within a circular economy vision, waste occurring during the production phase could be recycled and therefore become a resource. As an alternative to the production of new products, used products can be remanufactured and therefore contribute to a higher efficiency of the raw materials use. To adapt the circular economy approach to production may require a re-design of complete industrial processes including new business models, e.g. for remanufactured products. In this topic we are looking for innovative technologies or methods re-designing industrial processes. For instance, proposals could address challenging subjects like metallurgical processes for low-grade or non-conventional ore deposits, bio-leaching, advanced purification or extraction processes based on bio-, hydro- or pyro-metallurgy, or a combination of them. Therefore, a full understanding of the innovation and research needs across the life cycle is required to ensure that the greatest environmental benefits can be obtained. Proposals should address reduction of waste and/or recycling of waste, like scraps, ashes, or industrial effluents, for more direct and less energy- and resource consuming processes. Additionally, energy efficiency, environmental, and social impact could be considered. Proposals should be of high impact both in terms of the market opportunity they address, and the environmental/societal benefits they will enable.

4. **Recycling and Re-use of End-of-Life Products:** (e.g. waste of electric and electronic equipment (WEEE), permanent magnets, complex metal alloys etc.) It is essential to turn the raw materials value chain into a materials cycle, where dissipation and waste are avoided as much as possible. A specific challenge is the recycling of raw materials from complex products. In this topic we are seeking for proposals to address this challenge through new concepts, technologies and services which increase the supply of raw materials, especially critical raw materials, recovered from products and components at the end of their life. Proposals could, for instance, focus on collection and logistic methods; efficient and innovative separation, physical sorting and pre-treating techniques; innovative and efficient hydro- and pyro-metallurgical processes for critical raw materials separation and extraction from end-of-life products. The marketing of used products or products made from recycling material may face economic, legal or psychological barriers which should be addressed if needed. Innovative business models will be a major driver to overcome these barriers. It is expected that the assessment of the potential impact of the proposed innovation on raw materials efficiency considers the whole life cycle of the products. Proposals could furthermore address energy efficiency, environmental issues or social impact.

5. **Cross-cutting topics** that are relevant to any part of the raw materials life cycle can also be specifically addressed. **Therefore, within this topic we are looking for proposals addressing non-technological innovations in order to increase the economic, environmental and social sustainability in the raw materials sector regarding:**

- **New business models,**
- **Improvement of methods or data for environmental impact assessment,**
- **Social acceptance and trust/public perception of raw materials.**

A major challenge in the raw materials sector is that entrepreneurs, with novel, high-impact and

potentially transformative approaches to raw materials supply, may face barriers, such as substantive investments in existing infrastructure, making the system resistant to change. Applicants are therefore encouraged to respond to this challenge and to develop new business models for a successful implementation of the developed technologies. Development of new, efficient methods of Life Cycle Analysis and stock flows, also for environmental monitoring (including real time monitoring), are encouraged. Gaining public trust in industrial activities is increasingly important in securing the raw materials supply in Europe from primary and secondary sources. Understanding the public perception of raw materials related activities will be supported in the cross-cutting topics. To address the topic of social acceptance/public perception, adequate expertise both from social scientists and geoscientist/engineers/industry is essential. Proposals will be evaluated by considering the potential presented for new, high-impact and potentially transformative business models, environmental and/or societal benefits in the raw materials sector. We encourage inclusion of cross-cutting topics in proposals addressing the other topics.

The topics and sub-topic areas are shown in Appendix I. Background information on the research needs per topic and sub-topic areas was identified by the **ERA-MIN Research Agenda**, which can be downloaded from the ERA-MIN 2 website at the following link: [https://www.era-min.eu/sites/default/files/publications/era-min\\_research\\_agenda.pdf](https://www.era-min.eu/sites/default/files/publications/era-min_research_agenda.pdf)

**Please note that not all topics are supported by all Funding Organisations, see summary in Table 2.**

means that there are some related restrictions. Always check with the corresponding national/regional Funding Organisation for restrictions.

**Table 2:** Summary of the main call topics supported by the Funding Organisations.

Country/region	Funding Organisation	Topic 1	Topic 2	Topic 3	Topic 4	Topic 5

## 5. Who may apply

This call for proposals is aimed at all actors in the raw materials value chain, including academia, industry, NGOs, public authorities and civil society that can contribute to the objectives of ERA-MIN 2 and who meet the eligibility criteria in section 7, as well as national/regional regulations (see Appendix IV).

A consortium must consist of *at least three project partners eligible to request funding* from the participating Funding Organisations of, at least, two different countries whereof one is an EU Member State or Associated Country. Please note that not all participating Funding Organisations are EU Member States, namely Argentina, Brazil, Chile, Canada (Québec) and South Africa and the

only EU Associated Country participating in the call is Turkey.

Organisations from countries/regions not participating in the Call can be partners of the consortium on the condition that they provide evidence of the availability of their own funds to cover their project activities.

The consortium size should be suitable for the level and complexity of the project and each partner should have a significant contribution for the transnational added value of collaboration.

Consortia involving both academic and industrial organisations are particularly encouraged to apply.

Project consortia covering the entire innovation chain from idea to end-user/market are considered positive as well as consortia with actors traditionally working in other industries, so that more ground-breaking innovations can be created through new approaches.

ERA-MIN 2 supports gender equality, therefore applicants are encouraged to consider gender equality in, for example:

- Selection of project manager
- Composition of project group
- Division of work, power and influence in the project
- Involvement of target groups

## 6. What do we fund

ERA-MIN Joint Call 2018 addresses all aspects of the non-energy, non-agricultural raw materials life cycle, covering both primary and secondary resources. It is encouraged to include cross-cutting topics in topics 1-4, as well as addressing more than one topic to get a more holistic view of the value chain.

In line with ongoing efforts within a circular economy approach, ERA-MIN 2 will emphasise the contribution of proposals to the EU's transition to a circular economy by funding projects aiming at retaining the value of the raw materials that are used in products.

Overall, ERA-MIN 2 can fund basic research, applied research and experimental development projects that are 12-36 months long and address the scope and topics of the call. However, **not all funding agencies can fund all types of research, see Table 3.**

means that there are some related restrictions. Always check with the corresponding national/regional Funding Organisation for any restrictions and 'State Aid Rules'.

**Table 3:** Type of research and entities eligible for funding by the participating Funding Organisations.

Country/Region	Funding Organisation	Fundamental/ Basic research	Industrial/ Applied research	Experimental research	TRL	Type of entities eligible for funding

TRL – Technology Readiness Level (as defined in Appendix II).

## 7. Eligibility criteria

For a proposal to be assessed by the Scientific Evaluation Board (SEB) the following eligibility criteria, **as well as the national/regional funding regulations**, must be met:

- The proposals must be submitted via electronic form through the ERA-MIN 2 Electronic Submission System, by the Lead Researcher of the consortium coordinator no later than **January 31<sup>st</sup>, 2019, at 17:00:00 CET**.
- Each consortium must comprise at least three independent legal entities eligible to request funding from the participating Funding Organisations of, at least, two different countries where at least one country is an EU Member State or EU Associated Country (Turkey) named in this call.
- The coordinator of the consortium must be eligible for funding and be established in a country or region participating in the Call.
- A Lead Researcher can only represent the coordinator in one proposal (i.e. if a Lead Researcher coordinates one proposal, he/she can only participate in other proposals as a researcher/key personnel of a consortium partner).
- Researchers from the participating Funding Organisations cannot apply to this Call.
- The total efforts of partners from one country in a proposal cannot exceed 70% of the total project efforts (measured in person-months).
- The project duration shall be a minimum of 12 months and shall not exceed 36 months.
- Each partner requesting funding must comply with the national/regional funding criteria and regulations of their respective Funding Organisation to ensure the eligibility of the consortium proposal (see Appendix IV). Please note that this may include sending additional information/documentation to your national/regional Funding Organisation.
- All applicants requesting funding must provide a statement of commitment (Form B, available at <https://www.era-min.eu/joint-call/era-min-joint-call-2018>), duly signed and stamped by the legal representative of the organisation **or** the Lead Researcher.
- Applicants not requesting funding, or not eligible for national/regional funding, can be partners of the consortium on the condition that they provide evidence of the availability of their own funds to cover their costs by providing a signed Statement (Form C available at <https://www.era-min.eu/joint-call/era-min-joint-call-2018>).
- The language of the proposals is English.
- All sections of the proposal technical description (Form A) must be filled in and the total length cannot exceed 23 pages, excluding the financial plan, references, ethics issues table, CVs, Forms B and Forms C.
- The ethics issue table, the CVs of key personnel and the Forms B and Forms C (available at <https://www.era-min.eu/joint-call/era-min-joint-call-2018>) must be filled in and attached to the proposal.

Not all Funding Organisations can fund projects related to all topics, and funding eligibility criteria may differ between countries/regions. Applicants are responsible for ensuring that the Funding Organisation for their country/region has confirmed its participation in the relevant topic and

sub-topic for their proposal, and to check which type of organisation can be funded at what level of support and the maximum budget available. A summary of some national/regional funding rules is provided in Table 2 and 3, as well as in the national/regional funding regulations (Appendix IV) but **applicants are obliged to check with their national/regional contact point (Table 1) for regulations.**

## 8. Evaluation criteria and procedures

The evaluation procedures are designed to identify the best proposals in terms of scientific excellence, impact, quality and efficiency on the implementation, as thoroughly and accurately as possible; and to undertake the assessment in a fair, transparent and homogeneous way for all proposals submitted in the Call.

The following is a schematic representation of the evaluation and decision-making process:

1. Proposal submitted via the Electronic Submission System (ESS).
  2. The submitted proposals will be subject to a general, as well as a national/regional eligibility check performed by the Joint Call Secretariat (JCS) and by the Call Steering Committee (CSC), composed of representatives from the participating Funding Organisations, to confirm compliance with national/regional priorities, rules and regulations before the start of the international independent peer-review evaluation process.
  3. The quality assessment of the eligible proposals will be performed by the Scientific Evaluation Board (SEB) composed of international independent expert reviewers. This will result in a ranking of the proposals and recommendations for funding or not.
  4. The CSC decides which projects will receive funding based on the ranking list and national/regional available budgets.
  5. Applicants are notified of the decisions and receive feedback on the evaluation of their proposal.
- Proposals will be evaluated based on three main evaluation criteria: 1) Scientific Excellence, 2) Impact and 3) Quality and Efficiency of the Implementation. Evaluation scores will be awarded to the three main evaluation criteria and not individually for the different sub-criteria.

### 1. SCIENTIFIC EXCELLENCE

- Clarity and pertinence of the objectives;
- Soundness of the concept, and credibility of the proposed methodology;
- Extent that the proposed work is beyond the state of the art, and demonstrates innovation potential (e.g. ground-breaking objectives, novel concepts and approaches, new products, services or business and organisational models);
- Appropriate consideration of interdisciplinary approaches and, where relevant, use of stakeholder knowledge;

### 2. IMPACT

- The extent to which the outputs of the project would contribute at the European and/or International level to expected impacts in line with the integrated strategy proposed in the EU Raw Materials Initiative (RMI) and the Strategic Implementation Plan of the European

#### Innovation Partnership (EIP) on Raw Materials;

- Any substantial impacts that would enhance innovation capacity, create new market opportunities, strengthen competitiveness and growth of companies, address issues related to barriers/obstacles, and any framework conditions such as regulation, standards, public acceptance, workforce considerations, financing of follow-up steps, cooperation of other links in the value chain, or bring other important benefits for society;
- Quality of the proposed measures to exploit and disseminate the project results (including management of IPR), and to manage research data where relevant;
- Quality of the proposed measures to communicate the project activities to different target audiences;
- Support the development of technological solutions and services for the implementation of the Strategic Implementation Plan of the European Innovation Partnership on Raw Materials.

### 3. QUALITY AND EFFICIENCY OF THE IMPLEMENTATION

- Quality and effectiveness of the work plan, including extent to which the resources assigned to work packages are in line with their objectives and deliverables;
- Appropriateness of the management structures and procedures, including risk and innovation management;
- Quality and complementarity of the participants and extent to which the consortium as whole brings together the necessary expertise;
- Appropriateness of the allocation of tasks, ensuring that all participants have a valid role and adequate resources in the project to fulfil that role.

Each criterion will be scored out of 5 and the threshold for individual criterion will be 3.

The overall rating will be the sum of the individual criterion scores (0-15). The overall threshold for proposals, applying to the sum of the three individual scores, will be 10. Proposals not meeting the thresholds will not be recommended for funding by the SEB.

### 9. How to apply

A joint transnational proposal shall be prepared in English by the consortium and submitted via the ERA-MIN 2 Electronic Submission System (<http://www.submission-era-min.eu/>) by the Lead Researcher representing the coordinator no later than **January 31<sup>th</sup>, 2019 at 17:00:00 CET**.

If required by the national/regional regulations, the submission forms or other documents must be submitted directly to the participating Funding Organisations according with their deadlines, no later than 10 working days after the proposal submission deadline. **Please consult your regional/national contact point (Table 1) for further details.**

#### *Registration*

The coordinator (Partner 1), who will represent the consortium, will have to register at the ERA-MIN 2 Electronic Submission System ([coordinator registration link](#)) before submitting a proposal. Once registered, the coordinator will receive a registration email with the login link ([coordinator login link](#)). The

coordinator will need to register the partners of the consortium. After registration, all the partners will receive an email to activate their account. With his/her account, each partner will enter his/her own profile ([partner login link](#)).

#### *Proposal form*

The proposal form must be filled in by the coordinator, except for the partner's profiles.

Templates for the technical description of the proposal (23 pages, Calibri, 11pt, single spaced; the template's margins of the page should be kept) and annexes are available at <https://www.era-min.eu/joint-call/era-min-joint-call-2018>.

Signed Statement of Commitments from all partners requesting funding (Form B) and Statements of Own Funding (Form C) from partners not requesting funding must be included as annexes to the proposal. The coordinator has the duty to ensure that Form B and Form C are signed in due time. Resubmitting the proposal before the submission deadline is possible.

#### **10. Terms and conditions**

For proposals recommended for funding, the partners will be asked to contact the respective Funding Organisation for further instructions regarding national/regional internal procedures. The negotiation phase is carried out following the usual rules of each Funding Organisation.

Each beneficiary will have a separate funding contract/letter of grant according to national/regional regulations with the appropriate national/regional Funding Organisation. Changes to the composition of research consortia or to the budget cannot occur during the contract/letter of grant, unless there is an appropriate justification. The beneficiaries shall inform the JCS and the Funding Organisations of that project of any event that might affect the implementation of the project.

The partners of the projects selected for funding must fix a common project start date, which will be the reference date for annual and final reports. It is expected that grant negotiations may take up to 3-4 months after the notification of results. The project should not start later than November 1, 2019, unless national/regional rules say otherwise.

The list of funded projects will be published on the ERA-MIN 2 website.

The beneficiaries of a project selected for funding must sign a Consortium Agreement (CA) for cooperation, preferably before the official project start date but no later than six months after the official project start date, considering that some Funding Organisations cannot conclude the grant agreements without a signed CA. Each Funding Organisation will indicate when they expect the CA and how to submit it. A copy of the duly signed CA should be sent to the Funding Organisations if asked for.

Models of CA are available (<http://www.desca-2020.eu/>), but the consortium is free to define its own CA subject to applicable legal and regulatory provisions.

The national/regional Funding Organisations shall have the right to use documents, information and results submitted by the research partners and/or to use the information and results according to their national/regional rules on IPR.

Beneficiaries must ensure that all project publications etc. include a proper acknowledgement to ERA-MIN 2, the European Commission, and the respective Funding Organisation.

On behalf of the consortium, the coordinators of the funded projects will submit annual reports in English to the JCS that contain information on scientific and administrative aspects. In addition, each beneficiary in a selected funded project must report to their respective national/regional Funding Organisation, according to their administrative funding rules. The beneficiaries are instructed to immediately contact the coordinator, the Funding Organisations involved and the JCS with any contingency that may arise.

If requested, the Lead Researcher of the consortium coordinator (or a representative of the project) is expected to attend meetings organised by ERA-MIN 2 (max 2 meetings will be arranged). In addition, the beneficiaries should participate and contribute to any communication activity initiated by ERA-MIN 2 in the funding period and beyond.

## **11. Open Access and Open Data**

The optimisation of the impact of publicly-funded scientific research is of fundamental importance to improve conditions to i) minimise the time spent searching for information and accessing it, ii) be able to speed up scientific progress, and iii) make it easier to cooperate across and beyond the European Union.

Open Access recommendations for all scientific publications produced by the funded projects will support Green Open Access (immediate or delayed open access provided through self-archiving), and/or Gold Open Access (immediate open access provided by a publisher) only depending on cost eligibility. In the case of Green Open Access, partners will (as soon as possible and at the latest on publication) deposit a machine-readable electronic copy of the published version or final peer-reviewed manuscript accepted for publication in a repository for scientific publications. In addition, partners will ensure open access to the deposited publication and bibliographic metadata.

In relation to Open Data, the funded projects will be recommended to submit metadata on all the data resources directly generated by the project on the Raw Material Information System (RMIS) of JRC, as well as additional information on how these data will be exploited, if and how data will be made accessible for verification and re-use, and how it will be curated and preserved. Additionally, we encourage the researchers to register online at “The Green Best Practice Community” of JRC and propose case studies and best practices. Metadata and additional information will be made publicly available via the ERA-MIN 2 website. The Contact Point on Open Access and Open Data will be disseminated on ERA-MIN 2 website, alongside specific information and procedures. ERA-MIN 2 will comply with the Protection of Personal Data Requirements by following the ethical standards and guidelines of Horizon 2020 and applicable EU and national law.

## APPENDIX I Sub-topic areas for research

<b>1. Supply of raw materials from exploration and mining</b>	
<b>1.1</b>	<b>Exploration, e.g.</b> <ul style="list-style-type: none"> <li>• Understanding primary and secondary raw materials resources for securing the supply chain,</li> <li>• Tools for identifying resources and improving mineral resource modelling,</li> <li>• Innovative approaches and tools for ore characterization</li> <li>• Concepts and methodologies for assessing mineral resource supply risks</li> </ul>
<b>1.2</b>	<b>Mining operations, e.g.</b> <ul style="list-style-type: none"> <li>• Smart and eco-efficient technologies for mining</li> <li>• Extraction of raw materials from historical dumps and tailings</li> <li>• Enhanced landfill mining</li> <li>• Technologies for the extraction of unconventional resources incl. intelligent mining</li> </ul>
<b>1.3</b>	<b>Mine closure and reclamation, e.g.</b> <ul style="list-style-type: none"> <li>• Remediation after mine closure with field demonstration at real-scale</li> <li>• Predictions of mine closure long-term performance</li> <li>• Long-term monitoring systems</li> </ul>
<b>2. Design</b>	
<b>2.1</b>	<b>Product design for increased raw material efficiency</b>
<b>2.2</b>	<b>Product design for reuse or extended durability of products</b>
<b>2.3</b>	<b>Product design to promote recycling (e.g. facilitation of dismantling)</b>
<b>2.4</b>	<b>Product design for critical materials substitution, e.g.</b> <ul style="list-style-type: none"> <li>• Developing products, services and technologies with same functionalities avoiding critical materials, or by substituting the functionality itself</li> <li>• Replace 'substances of very high concern' (SVHCs) of the REACH regulation</li> <li>• Reduce or avoid the use of materials with low abundance and/or difficult/risky supply</li> </ul>

<b>3. Processing, Production and Remanufacturing</b>	
<b>3.1</b>	<b><i>Increase resource efficiency in resource intensive production processes, e.g.</i></b> <ul style="list-style-type: none"> <li>• <i>Increase material and energy efficiency of ore processing</i></li> <li>• <i>Overcome metallurgical challenges for metal production from primary and secondary sources</i></li> <li>• <i>Valorisation of by-products, co-products</i></li> <li>• <i>Re-design production cycles, networks and cascades</i></li> </ul>
<b>3.2</b>	<b><i>Increase resource efficiency through recycling of residues or remanufacturing of used products and components, e.g.</i></b> <ul style="list-style-type: none"> <li>• <i>Scrap metals</i></li> <li>• <i>Residues from manufacturing</i></li> <li>• <i>Tailings from mining</i></li> <li>• <i>Innovative technologies and business models for remanufacturing</i></li> </ul>
<b>3.3</b>	<b><i>Increase resource efficiency using information and communication technologies (ICT), e.g.</i></b> <ul style="list-style-type: none"> <li>• <i>Supply chain management across the whole life cycle</i></li> <li>• <i>Management of production cycles, networks or cascades</i></li> <li>• <i>Smart technologies for processing, production and remanufacturing (e.g. sensor-based sorting of metals scrap, efficient characterisation of used products)</i></li> </ul>
<b>4. Recycling and Re-use of End-of-Life products</b>	
<b>4.1</b>	<b><i>End-of-life products collection and (reverse) logistics</i></b>
<b>4.2</b>	<b><i>End-of-life products pre-processing: pre-treatment, dismantling, sorting, characterisation, e.g.</i></b> <ul style="list-style-type: none"> <li>• <i>Efficient characterisation and separation of products and components for re-use or recycling</i></li> <li>• <i>Overcome barriers for second-life products</i></li> </ul>
<b>4.3</b>	<b><i>Recovery of raw materials from End-of-life products, e.g.</i></b> <ul style="list-style-type: none"> <li>• <i>Recover metals and rare earth elements from urban mines via innovative, clean and environmental-friendly processes (hydrometallurgy, pyrometallurgy...) and separation techniques</i></li> </ul>
<b>4.4</b>	<b><i>Increase recycling of End-of-Life products through information and communication technologies (ICT), e.g.</i></b> <ul style="list-style-type: none"> <li>• <i>Databases and models on raw materials in buildings, infrastructure and products</i></li> <li>• <i>IT-based tools for efficient management of supply chains across the whole life cycle</i></li> <li>• <i>Smart recycling technologies (e.g. sensor-based sorting)</i></li> <li>• <i>Simulation of different re-use and recycling pathways applying a life cycle perspective</i></li> </ul>

<b>5. Cross-Cutting Topics</b>	
<b>5.1</b>	<b><i>New business models</i></b>
<b>5.2</b>	<b><i>Improvement of methods or data for environmental impact assessment (e. g. LCA - life-cycle analysis)</i></b> <ul style="list-style-type: none"> <li><i>Studies on flows of mineral resources (e. g. MFA - material-flow analysis)</i></li> </ul>
<b>5.3</b>	<b><i>Social acceptance and trust/public perception of raw materials, e.g.</i></b> <ul style="list-style-type: none"> <li><i>Public perception for activities associated with raw materials supply</i></li> <li><i>Standardized social science methodologies for gathering/analysing data in different countries</i></li> <li><i>Case studies</i></li> </ul>

## **APPENDIX II Technology Readiness Level (H2020 definition)**

- TRL 1 – basic principles observed
- TRL 2 – technology concept formulated
- TRL 3 – experimental proof of concept
- TRL 4 – technology validated in lab
- TRL 5 – technology validated in relevant environment
- TRL 6 – technology demonstrated in relevant environment
- TRL 7 – system prototype demonstration in operational environment
- TRL 8 – system complete and qualified
- TRL 9 – actual system proven in operational environment

### APPENDIX III Definitions

**Applicant:** is a legal entity, represented by a Lead Researcher that forms a consortium at the stage of proposal submission.

**Beneficiary:** Beneficiary is a legal entity, represented by a Lead Researcher, member of a consortium selected for funding that receive financial support from the respective national/regional Funding Organisation.

**Call:** Refers to the ERA-MIN Joint Call 2018 opening in October 31, 2018 which total budget is €14.43 million.

**Call Steering Committee (CSC):** Comprises representatives of the Funding Organisations that have committed national/regional funds to support the selected R&I projects. It supervises the whole Call procedure and agrees on the final list of proposals recommended for funding. It supervises the activities of the Joint Call Secretariat.

**Consortium:** Group of legal entities, each represented by a Lead Researcher, that are part of a joint collaborative R&I project proposal submitted to the Call or a project selected for funding.

**Coordinator:** One partner of the consortium represented by a Lead Researcher, who will be responsible for the internal scientific management of the project, intellectual property rights management, project reporting towards the JCS and CSC and will represent the consortium externally.

**Funding Organisations:** are responsible for providing funding under relevant rules and regulations to the beneficiaries from the respective country/region.

**Joint Call Secretariat (JCS):** Is responsible for the implementation of the Call and the follow-up phase until the funded projects and all reporting requirements have ended. All submitted proposals are collected by the JCS, which makes them available to the CSC and the reviewers of the Scientific Evaluation Board. The JCS handles the communication with the applicants, reviewers, CSC and beneficiaries. The JCS is hosted by FCT (Foundation for Science and Technology), in Lisbon (Portugal) with the support of Ptj (Germany) regarding the ESS.

**Key Personnel:** is a team member person of an applicant or a beneficiary.

**Lead Researcher:** is the main responsible person of a legal entity and is the contact point with the corresponding national/regional Funding Organisation.

**Partners:** legal entities, each represented by a Lead Researcher within a department or institute from universities, research organisations, companies, etc., forming a consortium.

**Scientific Evaluation Board (SEB):** Panel of internationally independent recognised scientific experts responsible for the quality assessment of the submitted proposals. SEB members will not submit or participate in proposals within this Call and must sign declarations of confidentiality and of conflict of interest.

## APPENDIX IV National/regional funding regulations

### Belgium/Brussels –Innoviris

#### a) Regional eligibility criteria

<b>Regional Contact Point</b>	Name: Beata Bibrowska, EU projects Manager E-mail: bbibrowska@innoviris.brussels Tel: +32(0) 474 29 69 34
<b>Eligible entities</b>	Universities, R&D institutes, SME's and Large companies, NGOs (associations for and not for profit). All organisation must be legal entities. <ul style="list-style-type: none"> <li>Private companies established in the Brussels Capital Region with a sustainable activity in this region based upon a sound business model. The entities have not received public funding for the same activities.</li> <li>Brussels Capital Region universities and research organisations could participate alone or with regional enterprise or association,</li> <li>Brussels based associations active in the field alone or with regional enterprise or university</li> </ul>
<b>Eligible topics</b>	2-5
<b>Eligible type of research and TRL</b>	Industrial/Applied Research and Experimental development/Innovation TRL-3-7
<b>Additional eligibility criteria</b>	<ul style="list-style-type: none"> <li>Each beneficiary develops entirely or partially its activities in Brussels Capital Region</li> <li>Each beneficiary will perform a research or innovation activity in the project</li> <li>The project will be innovative and will present the positive impact on regional economy and employment by valorisation of results in the region</li> <li>Brussels municipalities and public utility organisations can benefit from funding in this call.</li> </ul> <p>All applicants should demonstrate their viability and financial soundness regarding their own contribution to the project and the implementation of the results. Organisations that perform economic activities and are established in Flanders or Wallonia regions are excluded from Innoviris funding.</p> <p><b>Parallel to ERA-MIN proposal, the submission of the proposal at regional level is compulsory. Proposals not submitted to Innoviris will not be eligible.</b></p>
<b>Eligible costs</b>	<ul style="list-style-type: none"> <li>Personnel costs</li> <li>Operational Costs</li> <li>Investment costs</li> <li>Indirect costs (10% of personnel +operational costs)</li> <li>Subcontracting</li> </ul>

## b) Funding rates

Maximum funding percentages:

Type of research	Large Enterprises	Medium Enterprises	Small Enterprises	Academia, associations*
Industrial/Applied Research	65%	75%	80%	100%
Experimental development	40%	50%	60%	100%
Process innovation	15%	25%	15%	

\*Associations-eligibility and funding rate confirmation after analysis of “declaration of economic activities”

## Belgium/Flanders – FWO

### a) Regional eligibility criteria

<b>Regional Contact Point</b>	Dr. Olivier Boehme Coordinator Strategy and Policy Cell Toon Monbaliu Advisor research affairs +32 2 550 15 70 <a href="mailto:eranet@fwo.be">eranet@fwo.be</a> <a href="http://www.fwo.be">www.fwo.be</a>
<b>Eligible entities</b>	The eligibility of the host institutions and involved researchers depends on the compliance with the FWO Research Project regulations, and more specifically regarding <a href="#">art. 9 – ‘contracting parties’</a> . In practice this comes down to a so-called ‘ZAP-position’ at an eligible main host institution.
<b>Eligible topics</b>	All
<b>Eligible type of research and TRL</b>	Only fundamental research ( <b>TRL 1</b> ) will be funded by FWO in this call.
<b>Additional eligibility criteria</b>	Researchers can only be involved in 2 projects/consortia per call, conform <a href="#">art. 5 of the Research Projects Regulations</a> . Additionally, we encourage researchers to inform their host institution (research coordination units (DOCs)) about their participation, for administrative purposes.

<b>Eligible costs</b>	<p>Funding money can be used for staff, consumables and equipment. The minimal and maximal allowed funding amounts per cost category, as applicable for the regular FWO-projects, are not applicable for the projects funded by FWO in ERA-NET.</p> <p>Overhead is not an eligible cost, nor should it be taken up in the financial/budget overview. Notwithstanding, the FWO pays the host institutions of a project directly 6% overhead on top of the funding amount.</p>
-----------------------	--

b) Funding rates

Maximum funding percentages:

Type of research	Universities and research organisations
Fundamental Research	100

**Belgium/Flanders -Hermesfonds**

a) Regional eligibility criteria

<b>Regional Contact Point</b>	<p>Name: Elsie De Clercq E-mail: <a href="mailto:elsie.declercq@vlaio.be">elsie.declercq@vlaio.be</a> Tel: +32 2 432 42 78</p>
<b>Eligible entities</b>	<p>Any enterprise, from a Flemish SME to the Flemish branch of a multinational company may request funding. The only condition is that the enterprise should have a legal personality upon signing the agreement. Furthermore, the enterprise should have the capacity to exploit the result to a sufficient extent in Flanders and hence create enough economic impact in the form of employment and investments.</p> <p>Note: Flemish research centres cannot apply, but they can be subcontractor of the Flemish enterprise.</p>
<b>Eligible topics</b>	1-4
<b>Eligible type of research and TRL</b>	<p>Fundamental/Basic Research, Industrial/Applied Research and Experimental Research</p> <p>TRL 2-7</p>
<b>Additional eligibility criteria</b>	<ul style="list-style-type: none"> <li>At least € 25.000 funding</li> <li>Before initiating a funding request for international projects, the applicant should contact VLAIO – Flemish applicants need to provide a regional ERA-NET addendum to VLAIO (through the VLAIO electronic application system see <a href="http://www.vlaio.be">www.vlaio.be</a> “Subsidies &amp; financiering” – “Onderzoeksproject” or “ontwikkelingsproject”</li> </ul>

	<ul style="list-style-type: none"> <li>The maximum amount of funding for one project is € 500.000</li> </ul>
<b>Eligible costs</b>	The budget of the Flemish industrial partner consists of own payroll costs, other costs (i.e. direct and indirect costs), costs large subcontractors, large costs, costs research partners

b) Funding rates

Maximum funding percentages:

Type of research	Large Enterprises	Medium Enterprises	Small Enterprises	Universities and research organisations
<b>Fundamental/Basic Research</b>	Maximum 60	Maximum 60	Maximum 60	Subcontractor of the Flemish enterprise
<b>Industrial/Applied Research</b>	Maximum 60	Maximum 60	Maximum 60	Subcontractor of the Flemish enterprise
<b>Experimental development</b>	25 + 10 cooperation bonus	25 + 10 cooperation bonus + 10 ME bonus	Maximum 50	Subcontractor of the Flemish enterprise

**Belgium/Wallonia –SPW-Wallonia**

a) Regional eligibility criteria

<b>Contact Point</b>	Name: Pierre Demoitié E-mail: pierre.demoitie@spw.wallonie.be Tel: 32 81 33 45 40
<b>Eligible entities</b>	Universities SMEs Research centres
<b>Eligible topics</b>	All
<b>Eligible type of research and TRL</b>	Fundamental/Basic Research, Industrial/Applied Research and Experimental Research 4-7
<b>Additional eligibility criteria</b>	Universities must work together with a SME or a Research Centre

<b>Eligible costs</b>	Personnel costs Equipment Materials and supplies costs Subcontracting Dissemination Travel expenses  according the Walloon rules
-----------------------	---

b) Funding rates

Maximum funding percentages:

Type of research	Large Enterprises	Medium Enterprises	Small Enterprises	Universities (1) and research organisations (2)
<b>Industrial/Applied Research</b>  <b>Experimental development</b>	Depending from the TRL, from the number of partners and from the type of cooperation according the Walloon rules			(1) 100 (2) 75

**Brazil - Finep**

a) National eligibility criteria

<b>National Contact Point</b>	Name: Tadzo Queiroz Tel: +55 21 2555-3935 E-mail: tadzo@finep.gov.br  Name: Henrique Vasquez Féteira do Vale Tel: +55 21 2555-0709 E-mail: hvasquez@finep.gov.br
<b>Eligible entities</b>	Companies, Public and Private Research Institutes and Universities.
<b>Eligible topics</b>	All
<b>Eligible type of research and TRL</b>	Fundamental/Basic Research, Industrial/Applied Research and Experimental development TRL 1-9
<b>Additional eligibility criteria</b>	Minimum budget (for Brazilian applicant activities): 100.000€ Maximum grant amount (to support Brazilian applicant activities): 375.000€

<b>Eligible costs</b>	<p>Personnel, Instrument and Materials, Equipment, Contractual research, Technical knowledge, construction and facilities exclusively for R&amp;D activities. Other operating expenses derived from the project.</p> <p>Limitations: For companies, CAPEX is limited to 20% of the grant. For Research Institutes and Universities, scholarships are not eligible.</p>
-----------------------	--

b) Funding rates

Maximum funding percentages:

Type of research	Large Enterprises	Medium Enterprises	Small Enterprises	Universities and research organisations
Fundamental/Basic Research	40	60	80	100
Industrial/Applied Research	40	60	80	100
Experimental development	40	60	80	100

Canada/Québec- FRQNT

a) National eligibility criteria

<b>National Contact Point</b>	<p>Laurence Martin Gosselin Responsable de programmes aux partenariats internationaux Fonds de recherche du Québec – Nature et technologies 140, Grande Allée Est, Québec (Québec), Canada, G1R 5M8 Tel (001) (418) 643-8560 #3455 <a href="mailto:Laurence.martingosselin@frq.gouv.qc.ca">Laurence.martingosselin@frq.gouv.qc.ca</a></p>
<b>Eligible entities</b>	<p>Only managing institutions recognized by the FRQ can be funded by the FRQNT. An eligible applicant is a university researcher or a college researcher (academia), excluding the individuals who are retired, as provided for in the <a href="#">Common General Rules of the FRQ</a>. Further information about eligibility of applicants and institutions is available in section 2 of the FRQ Common General Rules.</p>
<b>Eligible topics</b>	2 and 4
<b>Eligible type of research and TRL</b>	<p>Fundamental/Basic Research, Industrial/Applied Research and Experimental Research TRL 2-7</p>

<b>Additional eligibility criteria</b>	<p><b>Applicable policies</b></p> <p>Applicants and funding holders have to comply with the <a href="#">FRQ Common General Rules</a>, with research ethics policies applicable to their project, as well as with the FRQ <a href="#">Policy on Responsible conduct of research</a>.</p> <p>Applicants are encouraged to inform their host institution (office of research) about their participation to the present call.</p> <p><b>Forms to be submitted</b></p> <p>Only the applicants in a funded project will have to create a portfolio on the FRQnet and fulfil the appropriate form:  <a href="https://frqnet.frq.gouv.qc.ca/researchPortal/faces/jsp/login/login.xhtml?lang=FR&amp;site=null">https://frqnet.frq.gouv.qc.ca/researchPortal/faces/jsp/login/login.xhtml?lang=FR&amp;site=null</a>.</p> <p>Applicants in a funded project will have to fill an “Undertaking and Acknowledgement” form before receiving the funds.</p>
<b>Eligible costs</b>	Eligible costs are listed in the <a href="#">FRQ Common General Rules</a> .
<b>Maximum amount of requested funding</b>	<p>The maximum amount that can be requested to the FRQNT is 65 000€ per year, for up to 3 years, and per project (non-renewable). The total amount the FRQNT is committed to fund is 390 000€.</p> <p>All amounts will be granted in Canadian currency according to the exchange rates of the date the results of the call will be announced by ERA-MIN2.</p> <p>Overhead is not an eligible cost in the financial/budget overview. The FRQNT will pay the host institution of a project an additional 27% overhead on top of the funding.</p> <p>Funds are subject to availability of funds voted annually to FRQNT by the National Assembly of Québec and FRQNT Board of Directors’ approval.</p>

b) Funding rates

Maximum funding percentages:

Type of research	Universities and research organisations
Fundamental/Basic Research	100
Industrial/Applied Research	100
Experimental development	100

## Chile – CONICYT

### a) National eligibility criteria

<b>National Contact Point</b>	Pedro Figueroa pfigueroa@conicyt.cl
<b>Eligible entities</b>	Universities and research organizations
<b>Eligible topics</b>	All
<b>Eligible type of research and TRL</b>	Fundamental/Basic Research, Industrial/Applied Research TRL 1-7
<b>Additional eligibility criteria</b>	Maximum contribution requested from CONICYT: 100.000 € per project (total amount for three years).
<b>Eligible costs</b>	Personnel costs Equipment Materials and supplies costs Subcontracting Dissemination Travel expenses

### b) Funding rates

Maximum funding percentages:

<b>Type of research</b>	<b>Universities and research organisations</b>
<b>Fundamental/Basic Research</b>	100
<b>Industrial/Applied Research*</b>	100

## Finland-Business Finland

### a) National eligibility criteria

<b>National Contact Point</b>	Kari Keskinen E-mail: <a href="mailto:kari.keskinen@businessfinland.fi">kari.keskinen@businessfinland.fi</a> Tel. +358 50 5577843
<b>Eligible entities</b>	Universities, R&D institutes, SME's and Large companies, Organisations must be legal entities.
<b>Eligible topics</b>	All
<b>Eligible type of</b>	Industrial/Applied research and Experimental development TRL 4-8

<b>research and TRL</b>	
<b>Additional eligibility criteria</b>	Consortia must include at least two industrial partners (SMEs or large companies). There must be one partner with a parallel project and other company can be a funder or in-kind partner.
<b>Eligible costs</b>	<p>The following costs are eligible:</p> <ol style="list-style-type: none"> <li>1. personnel costs</li> <li>2. indirect costs.</li> <li>3. costs of equipment and devices</li> <li>4. subcontracting</li> <li>5. travel expenses</li> </ol> <p>For more information see: <a href="https://www.businessfinland.fi/suomalaisille-asiakkaille/etusivu/">https://www.businessfinland.fi/suomalaisille-asiakkaille/etusivu/</a></p>

b) Funding rates

Maximum funding percentages:

Type of research	Large Enterprises	Medium Enterprises	Small Enterprises	Universities and research organizations
Industrial/Applied Research	40	50	50	60
Experimental development	Loan 50	Loan 70	Loan 70	/

**France- ADEME**

a) National eligibility criteria

<b>Contact Point</b>	Name: Rachel BAUDRY E-mail: rachel.baudry@ademe.fr Tel: (33) 2 41 91 40 70
<b>Eligible entities</b>	Universities, R&D institutes, SME's and Large companies, NGOs (associations, foundations, etc.). Organisations must be <b>legal entities</b> .
<b>Eligible topics</b>	2-5
<b>Eligible type of research and TRL</b>	Industrial/Applied Research and Experimental development TRL 4-7
<b>Additional eligibility criteria</b>	<p>ADEME can only finance projects on <b>metallic resources and industrial minerals</b>. Projects on construction materials are not eligible.</p> <p>All French applicants must submit a national funding application, with financial information only, immediately after the submission of the proposal. The national application form will be sent by ADEME to the coordinator of each submitted proposals.</p>

<b>Eligible costs</b>	<p>ADEME's eligible costs are detailed in the following documents (available in French):</p> <ul style="list-style-type: none"> <li>• <a href="#">Règles générales d'attribution et de versement des aides de l'ADEME</a></li> <li>• <a href="#">Régime d'aides de l'ADEME à la recherche, au développement et à l'innovation</a></li> </ul> <p>It includes salaries, overheads, travel expenses, devices, equipment and operational costs.</p>
-----------------------	---

#### b) Funding rates

Maximum funding percentages:

Type of research	Large Enterprises	Medium Enterprises	Small Enterprises	Universities and research organisations
Industrial/Applied Research*	Max. 50	Max. 60	Max. 70	Max. 50
Experimental development*	Max. 25	Max. 35	Max. 45	Max. 50

#### France –ANR

##### a) National eligibility criteria

<b>National Contact Point</b>	<p>Massimiliano Picciani Chargé de mission scientifique ANR +33 1 73 54 81 96 <a href="mailto:massimiliano.picciani@anr.fr">massimiliano.picciani@anr.fr</a></p>
<b>Eligible entities</b>	<p>Universities and research organizations Large, medium and small enterprises Private non-profit organisations: see ANR funding regulations</p>
<b>Eligible topics</b>	<p>Projects concerning the following topics and sub-topics: Topic 1: only sub-topics 1.1 and 1.3 Topics 2, 3, 4, 5: all sub-topics</p> <p>Projects concerning the following subjects for all topics are not eligible:</p> <ul style="list-style-type: none"> <li>- CDW (construction and demolition wastes)</li> <li>- Off-shore exploration</li> </ul>
<b>Eligible type of research and TRL</b>	<p>Fundamental/Basic Research, Industrial/Applied Research TRL 1-5</p>
<b>Additional eligibility criteria</b>	<p>For French partners: see the National annex <i>“Annexe nationale ANR ERA-MIN 2 call 2018”</i></p>

<b>Eligible costs</b>	See ANR funding regulations (“Règlement relatif aux attributions des aides de l’ANR”, in the table below shortly indicated as RF) <a href="http://www.agence-nationale-recherche.fr/RF">http://www.agence-nationale-recherche.fr/RF</a>
-----------------------	--

b) National funding rates

Maximum funding percentages:

Type of research	Large Enterprises	Medium Enterprises	Small Enterprises	Universities and research organizations
<b>Fundamental/Basic Research</b>	30	45	45	50 or 100 (see RF)
<b>Industrial/Applied Research</b>	30	35 or 45 (see RF)	35 or 45 (see RF)	50 or 100 (see RF)

**Germany – PTJ on behalf of Federal Ministry of Education and Research (BMBF)**

a) National eligibility criteria

<b>National Contact Point</b>	Name: Holger Gruenewald Project Management Jülich E-mail: <a href="mailto:h.gruenewald@fz-juelich.de">h.gruenewald@fz-juelich.de</a> Tel. + 49 30 20199 3183
<b>Eligible entities</b>	Universities, R&D institutes, SME’s and Large companies, NGOs (associations, foundations, etc.). Organisations must be <b>legal entities</b> .
<b>Eligible topics</b>	3, 4 Applicants are encouraged to integrate the cross-cutting topics of topic 5 into their proposals. Proposals addressing only cross-cutting topics are not eligible.
<b>Eligible type of research and TRL</b>	Industrial/Applied Research and Experimental development TRL 4-8

<b>Additional eligibility criteria</b>	<ol style="list-style-type: none"> <li>1. All proposals must be aligned with the thematic scope of the research programme “Ressourceneffiziente Kreislaufwirtschaft” (<a href="https://www.fona.de/mediathek/pdf/Ressourceneffiziente_Kreislaufwirtschaft.pdf">https://www.fona.de/mediathek/pdf/Ressourceneffiziente_Kreislaufwirtschaft.pdf</a>) and the specific national funding regulations.</li> <li>2. A project consortium with German participation must include at least one German industrial partner.</li> <li>3. Funding rates of industrial partners will be decided on a case-by-case basis depending on the size of the company, type of research/development, risk associated with the research activities and commercial perspective of exploitation. The figures in the table below provide guidelines for the estimation of the funding rate.</li> <li>4. To clarify the eligibility of the thematic scope and the funding rates it is necessary to get in contact with the National Contact Point before submitting a proposal.</li> </ol>
<b>Eligible costs</b>	<p>Personnel, consumables, equipment, travel, subcontracting, overhead; corresponding to the national BMBF funding rules</p> <p>For more information or clarifications please contact Dr.-Ing. Holger Gruenewald, PtJ.</p>

b) National funding rates

Maximum funding percentages:

Type of research	Large Enterprises	Medium Enterprises	Small Enterprises	Universities and research organizations
Industrial/Applied Research	Up to 40	Up to 60	Up to 60	Up to 100
Experimental development	Up to 25	Up to 35	Up to 35	Up to 100

**Greece- GSRT**

a) National eligibility criteria

<b>National Contact Point</b>	<p>Name: Michael Kotsias E-mail: <a href="mailto:m.kotsias@gsrt.gr">m.kotsias@gsrt.gr</a> Tel: ++30 213 1300115</p>
-------------------------------	---

<b>Eligible entities</b>	<p>GSRT potentially supports all legal entities, private and public, namely:</p> <ul style="list-style-type: none"> <li>• Private – SME</li> <li>• Private – large companies</li> <li>• Non-profit research organisation</li> <li>• Higher education institution</li> <li>• Public research organisation</li> <li>• Public organisation</li> </ul> <p>GSRT does not support individuals and individual enterprises</p>
<b>Eligible topics</b>	1.3 (only) and 2-5
<b>Eligible type of research and TRL</b>	<p>The aided part of the research and development project shall completely fall within one or more of the following categories:</p> <p>(a) industrial research; (b) experimental development; (c) feasibility studies</p> <p>TRL 3-8</p>
<b>Additional eligibility criteria</b>	<p>The duration of a funded project is 24- 36 months</p> <p>Upper limit of the total public funding will be 200.000 € per project (including indirect costs). Please note that this amount can be increased to 250.000 € per project if Greek partner assumes the project coordination</p> <p><b>Greek partners can only participate in consortiums with project partners from three different countries</b></p>
<b>Eligible costs</b>	<p>(a) personnel costs: researchers, technicians and other supporting staff to the extent employed on the project; (regarding the individual enterprises the contracts should abide by the national legislation and guidelines)</p> <p>(b) costs of instruments and equipment to the extent and for the period used for the project. Where such instruments and equipment are not used for their full life for the project, only the depreciation costs corresponding to the life of the project, as calculated based on generally accepted accounting principles are considered as eligible.</p> <p>(c) Costs for of buildings and land, to the extent and for the duration period used for the project. Regarding buildings, only the depreciation costs corresponding to the life of the project, as calculated based on generally accepted accounting principles are considered as eligible. For land, costs of commercial transfer or actually incurred capital costs are eligible.</p> <p>(d) costs of contractual research, knowledge and patents bought or licensed from outside sources at arm's length conditions, as well as costs of consultancy and equivalent services used exclusively for the project;</p>

	<p>(e) additional overheads and other operating expenses, including costs of materials, supplies and similar products, incurred directly as a result of the project;</p> <p>Eligible costs as Indirect Costs</p> <p>Fixed percentage of up to 15% calculated based on the personnel budget of the partner. Indirect costs are eligible for all Legal Entities.</p> <p>Further information regarding the categorization of aid intensity and the eligibility of costs is available at the national guide published at GSRT website (current national call/adjustments may be made in the next national calls). For any clarifications please contact the NCP.</p> <p><a href="http://www.gsrt.gr/central.aspx?sld=108I334I1106I646I444510&amp;olID=777&amp;neID=673&amp;neTa=12_20503_1&amp;nclD=0&amp;neHC=0&amp;tbiD=0&amp;lrID=2&amp;oldUIID=aI777I0I119I428I1089I0I3&amp;actionID=load">http://www.gsrt.gr/central.aspx?sld=108I334I1106I646I444510&amp;olID=777&amp;neID=673&amp;neTa=12_20503_1&amp;nclD=0&amp;neHC=0&amp;tbiD=0&amp;lrID=2&amp;oldUIID=aI777I0I119I428I1089I0I3&amp;actionID=load</a></p>

Type of research	Universities and research organisations
Fundamental/Basic Research	Up to 100
Industrial/Applied Research	Up to 100
Experimental development	Up to 100

**Slovenia - MIZS**

a) National eligibility criteria

<b>Contact Point</b>	Name: Doroteja Zlobec E-mail: doroteja.zlobec@gov.si Tel: +386 1 478 46 24
<b>Eligible entities</b>	<p><b>Eligibility of a partner as a beneficiary institution:</b> research organizations as defined in the national <a href="#">Research and Development Act</a> (Zakon o raziskovalni in razvojni dejavnosti – ZRRD). All participating institutions have to be registered in the Slovenian Research Agency register of research institutions (Informacijski sistem o raziskovalni dejavnosti v Sloveniji - Sicris).</p> <p><b>Eligibility of principal investigator and other research team members:</b> The project activities of the Slovenian partner have to be under the supervision of the <u>primary investigator/primary researcher</u> who fulfills the requirements for project leader as defined in Art. 29 of the national Decree on norms and standards used to determine funding for research activities financed from the Republic of Slovenia budget (<i>Uredba o normativih in standardih za določanje sredstev za izvajanje raziskovalne dejavnosti, financirane iz Proračuna Republike Slovenije</i>, Uradni list RS, št. 103/11, 56/12, 15/14, 103/15, 27/17 in 9/18) hereinafter: <i>Decree on criteria and standards</i>). The criteria are further determined in the <a href="#">Rules on Determining the Fulfillment of Conditions for a Research Project Leader</a> (Pravilnik o kriterijih za ugotavljanje izpolnjevanja pogojev za vodjo raziskovalnega projekta). All participating researchers have to be <u>registered in the Slovenian</u></p>

	<u>Research Agency register of researchers (Sicris) and must have available research hours.</u>
<b>Eligible topics</b>	All
<b>Eligible type of research and TRL</b>	Basic research, applied research- The type of research conducted by Slovenian researchers must be defined and explained in the project proposal (e.g. in the Comments on budget section). TRL 1-6
<b>Additional eligibility criteria</b>	<p><b>Consortium with partners from at least 3 different countries participating at ERA-MIN 2018 Call are eligible!</b></p> <p>All Slovenian applicants must refer to the guidelines for Slovenian applicants published on the MIZS webpage (<a href="http://www.mizs.gov.si/si/javne_objave_in_razpisi/javni_razpisi/">http://www.mizs.gov.si/si/javne_objave_in_razpisi/javni_razpisi/</a>).</p> <p><b>Legal basis – national regulation</b></p> <p>State Administration Act (Zakon o državni upravi (Uradni list RS, št. 113/05 - UPB4, 89/07 - Odl.US, 126/07 - ZUP-E, 48/09, 8/10 - ZUP-G, 8/12 - ZVRS-F, 21/12, 47/13, 12/14, 90/14 in 51/16)) - Article 16 and 39; Public Finance Act (Zakon o javnih financah (Uradni list RS, št. 11/11- uradno prečiščeno besedilo, 14/13 – popr., 101/13, 55/15 – ZfisP, 96/15 – ZIPRS1617 in 13/18)) - Article 106. j; Regulation on the procedure of standards and manners to allocate means for the promotion of the evolutionary programme and the preferential tasks (Uredba o postopku, merilih in načinih dodeljevanja sredstev za spodbujanje razvojnih programov in prednostnih nalog (Uradni list RS, št. 56/11)); Implementation of the Republic of Slovenia's Budget for 2018 and 2019 Act (Zakon o izvrševanju proračunov Republike Slovenije za leti 2018 in 2019 (ZIPRS 1819) (Uradni list RS, št. 71/17 in 13/18-ZJF-H)); Integrity and Prevention of Corruption Act (Zakon o integriteti in preprečevanju korupcije (Uradni list RS, št. 69/11 – uradno prečiščeno besedilo)); Resolution on the National Research and Development Programme 2011-2020 (Resolucije o raziskovalni in inovacijski strategiji Slovenije 2011-2020 (RISS) (Uradni list RS, št. 43/11)), Research and development Act (Zakona o raziskovalni in razvojni dejavnosti (Uradni list RS, št. 22/06 – UPB1, 61/06-ZDru-1, 112/07, 9/11,57/12-ZPOP-1A in 21/18-ZNOrg)); Decree on norms and standards used to determine funding for research activities financed from the Republic of Slovenia budget (Uredbe o normativih in standardih za določanje sredstev za izvajanje raziskovalne dejavnosti, financirane iz Proračuna Republike Slovenije (Uradni list RS, št. 103/11, 56/12, 15/14, 103/15, 27/17 in 9/18)); Rules on criteria for establishing compliance with the conditions for being the head of a research project (Pravilnik o kriterijih za ugotavljanje izpolnjevanja pogojev za vodjo raziskovalnega projekta, Uradni list RS št. 53/16);</p>

	<p>Community Framework for State Aid for Research and Development and Innovation the provisions of the Community Framework for State Aid for Research and Development and Innovation (OJ EU C 198, 27. 6. 2014) (Okvir za državno pomoč za raziskave in razvoj ter inovacije (2014/C 198/01)); National scheme for state aid in Research and Development (Program za spodbujanje raziskav in razvoja Ministrstva za izobraževanje, znanost in šport na področju znanosti 2016-2020, št. 631-1/2016-1 z dne 8. 1. 2016); National strategy of open access to scientific publications and research data in Slovenia 2015-2020 (Nacionalna strategije odprtega dostopa do znanstvenih objav in raziskovalnih podatkov v Sloveniji 2015-2020, št. 60300-5/2015/5 z dne 3. 9. 2015).</p> <p><b>National contracting negotiations:</b> will commence after the projects are selected for funding on the level of the transnational call. National documentation, including evidence of the starting date of the transnational project (in the form of a Consortia Agreement or statement on the starting date by the transnational project coordinator), will be a prerequisite for signing the contract on national level. All Slovenian applicants are strongly advised to contact the Slovenian National Contact Person before preparing proposals for application.</p>
Eligible costs	<p><b>Total national funding:</b> max. 420.000,00 EUR including VAT</p> <p><b>Total requested funding per project:</b> for all Slovenian partners within one consortium must not exceed 70.000,00 EUR per year (210.000,00 EUR for the total project duration of 36 months).</p> <p><b>Eligibility of costs:</b> MIZS will fund all eligible costs of Slovenian researchers participating in successful transnational projects, recommended for funding in accordance with the <i>Decree on criteria and standards</i>. Eligible costs are defined based on the FTE value according to the Slovenian Research Agency's research project categorization (A, B, C or D based on the research conducted). Eligible costs must be directly related to the research conducted and should include <u>personnel</u>, <u>material</u> and <u>equipment</u> costs as elements of the FTE. Indirect costs are eligible. The value is calculated based on the FTE value of category A, B,C, or D research projects, under the condition that costs under each of the specific FTE elements are appropriately decreased (by a max. of 20% for indirect costs). Providing the stipulated conditions are met, the Public Procurement Act (Zakon o javnem naročanju (Uradni list RS, št. <a href="#">91/15</a> in <a href="#">14/18</a>) applies.</p> <p><b>Period of eligibility of public expenditures:</b> as of budgetary year 2020 until the end of the budgetary year 2022.</p>

	<p><b>Period of eligibility of expenditures on the project:</b> From the starting date of the transnational project stipulated in the consortium agreement for a period of 36 months, with a prescribed additional 30 day period for the payment of invoices related to the project costs. The period of eligibility of expenditures on the project can only start from the date the national contract enters into effect. The exact duration of the project will be defined in the contract between MIZS and the selected Slovenian partner, after the consortium agreement between the selected consortium partners enters into force.</p>

## Spain-AEI

### a) National eligibility criteria

<b>Contact Point</b>	<p>Name: Severino Falcón/Leonor Gómez</p> <p>E-mail: <a href="mailto:era-mat@aei.gob.es">era-mat@aei.gob.es</a></p> <p>Tel: +34 916037269</p> <p>Representative: Severino Falcón</p>
<b>Eligible entities</b>	<p>The eligible entities for the State Research Agency funding are:</p> <p>Non-profit research organizations according to the PCI 2020 call or its equivalent (Programación Conjunta Internacional 2020 o su equivalente).</p> <p>Although enterprises will not be funded through the PCI call, the Spanish industrial sector is much welcome to participate in the transnational consortia using their own funds.</p> <p>The Spanish research groups that apply for funding to AEI must comply with the requirements established by this transnational call and with the final rules on eligibility to be defined in the PCI 2020 call (or its equivalent), to be published here.</p>
<b>Eligible topics</b>	All
<b>Eligible type of research and TRL</b>	<p>Fundamental/Basic Research, Applied Research</p> <p>TRL 1-4</p> <p>Lower TRL research activities necessary to support demonstration and validation activities are potentially eligible for funding, where they are a minor but integral part of wider projects which progress a technology though to higher TRLs.</p>
<b>Additional eligibility criteria</b>	<p><u>Mandatory:</u></p> <p><u>Spanish Principal Investigators</u> <b>must be</b> eligible according to the PCI 2020 call or its equivalent and must have experience as investigators in projects funded by the <i>Plan Nacional I+D+i 2008-2011</i>, the <i>Plan Estatal I+D+i 2013-2016</i>, the <i>Plan Estatal I+D+i 2017-2020</i>, ERC Grants, European Framework Programmes or other relevant international programmes.</p> <p><u>Incompatibilities: These must be taken into account when participating in different ERA-Nets or other international initiatives.</u></p> <ul style="list-style-type: none"> <li>- <u>Principal Investigators</u> are not allowed to apply for funding in more than one proposal of this ERA-MIN 2 call.</li> <li>- <u>Principal Investigators</u> will not be allowed to apply for funding in more than one proposal in the same PCI call (or its equivalent).</li> <li>- <u>Principal Investigators</u> are not allowed to apply for funding in two consecutive PCI calls (or their equivalent).</li> <li>- <u>Principal Investigators</u> must remain unchanged between the proposal to this transnational call and the PCI 2020 call (or its equivalent).</li> </ul> <p>The State Research Agency will avoid double funding (overlapping with other EU or National funding) and will not grant projects or parts of projects already funded.</p>

	<p><b>The project duration has to be 2 or 3 years.</b></p> <p>As AEI expects to fund the Spanish eligible partners participating in the selected projects in this transnational call with the national PCI call 2020, the Spanish part of the transnational project eligible for AEI could start <b>not earlier than 1<sup>st</sup> January 2020</b>.</p> <p>The consortium submitting a proposal in which participate Spanish legal entities eligible for AEI must involve a minimum of three different countries participating in this call.</p> <p><b>Maximum funding for the ERA-MIN call 2018: 300.000 €</b></p> <p><u>The following funding limits are considered eligibility criteria. Proposals not respecting these limits could be declared ineligible.</u></p> <ul style="list-style-type: none"> <li>• Maximum per legal entity and proposal eligible for AEI should not exceed €37.000 per year. If two or more legal entities participate in the same proposal, the AEI part should not exceed €46.000 per year.</li> <li>• For entities carrying out experimental work, maximum per legal entity and per proposal eligible for AEI should not exceed €53.000 per year. If two or more legal entities participate in the same proposal, the AEI part should not exceed €63.000 per year.</li> <li>• If the transnational proposal is led by a PI eligible for AEI funding a maximum of 7.000 € per year in addition.</li> </ul> <p>Centres formed by different Spanish legal entities will be considered as a unique entity, and thus the maximum funding should not exceed the limits per proposal established above (for example, to mixed centres).</p> <p>The final funding will take into account the transnational evaluation of the collaborative proposal, the scientific quality of the Spanish group, the added value of the international collaboration, the participation of the industrial sector, and the financial resources available.</p>
<b>Eligible costs</b>	<ul style="list-style-type: none"> <li>- Personnel costs for temporary employment contracts (scholarships are not eligible).</li> <li>- Current costs, small scientific equipment, disposable materials, travelling expenses and other costs that can be justified as necessary to carry out the proposed activities.</li> <li>- Indirect costs (overheads) or clinical trials (proofs of concept, proofs of principle) <b>are not eligible</b> for funding in the PCI call.</li> </ul>
<b>Additional information</b>	<p><b>Funding Programme:</b> <i>Programa Estatal de Investigación, Desarrollo e Innovación Orientada a los Retos de la Sociedad, Plan Estatal de Investigación Científica y Técnica y de Innovación 2017-2020.</i> <a href="#">Enlace a Plan Estatal</a></p>

	<p>The instrument for funding the Spanish groups will be the Spanish national call on International Joint Programming or its equivalent (<i>Programación Conjunta Internacional o su equivalente</i>), which is expected to be launched in 2020 (PCI 2020). Only as a reference, the beneficiaries are advised to read the call <a href="#">PCI 2018</a></p> <p>The Spanish legal entities granted are obliged by the regulations established in this PCI national call (or its equivalent) and by the funding limits specified above.</p> <p>ERA-MIN 2 call will be managed by the <a href="#">Subdivisión de Programas Científico-Técnicos Transversales, Fortalecimiento y Excelencia</a></p> <p>The projects granted by the State Research Agency must be aligned with the main objectives described in the <a href="#">Programa Estatal</a>.</p> <p><b>Further instructions:</b> Any publication or dissemination activity resulting from the granted projects must acknowledge the State Research Agency funding: “Project (reference nº XX) funded by the State Research Agency through PCI (or its equivalent)”.</p>
